Kia ora and Welcome to Week 5.

Firstly, a big thank you to Edwin & Marianne Schweizer and Joel McKay for installing the basketball hoops. It's been great to see lots of children out there making good use of them.

Thank you to Mr Prestidge who has worked hard over the last few weeks to get the pool cleaned and ready for all our students to enjoy.

Pool keys are available to be hired for \$50 - can be used the whole season.

You must come into the office to collect and sign a pool use agreement.

Please settle invoices online (12-3155-0006515-00) or at the office ASAP

Have a great week.

Sue Ratcliffe (Principal)

Room 2 is learning about friction. Their challenge this week was to see whose ramps were going to have the most friction with an object with wheels. Friction is a force that happens when things rub together. The frictional force between road and tyre is what allows the tyre to push off the road and causes the car to go forward.

By Josephine Morris and Jessica Haskins

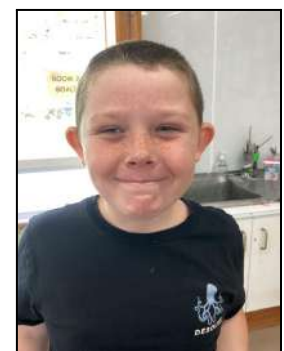

"Friction is stuff that goes on the road so that our cars slow down" - Bailey

"You can make friction by rubbing two objects together" - Xavier

"If I had a bike that didn't have any marks/grips on the wheels I would slip and slide and wouldn't stop" - Bree

"Rolling friction is when something circular is rolling and using the push and blow force" - George
